

# AIR NEW ZEALAND Environmental Policy

**We are committed to minimising the impact of our operations on our surroundings through the integration of sound environmental principles within all areas of Air New Zealand.**

**We will achieve this together by:**

- Operating within the framework of our environmental management system;
- Complying with all relevant environmental legislation;
- Keeping environmental aspects as key elements in our planning and implementation of new initiatives;
- Monitoring and reviewing clear environmental objectives and targets aimed at continual improvement;
- Investigating and implementing methods to aid in the prevention or reduction of pollution to air, land and water;
- Seeking continual improvement in our resource use efficiency; and
- Encouraging all Air New Zealanders to take individual responsibility for the environment in their communities and at work.

**Rob Fyfe**, Chief Executive Officer
